

## JX (Japan Transformation) Policy Proposal - JANE's Vision for Japan's Future - (Summary)

### Strategies to become an innovation powerhouse that attracts people, knowledge, and capital

- **Review the tax system, including lowering the maximum income tax rate**, in order to attract human resources from around the world
- Have head-on discussions on **immigration policy**
- **Recruit, develop and retain human resources to promote next-generation innovation** (utilize human resources overseas for the time being + domestic human resource development)
- Promote open wireless network (ex. simplification of identification procedures) ...etc.

### AI · Web3 Strategies

- Use AI and Web3 technologies to **globally promote Japan's added value** (pop culture, traditional culture, food, sightseeing experiences, etc.).
- **Contribute to international rulemaking of AI-related regulations based on the premise that human should make the best use of AI** while recognizing the challenges it faces ...etc.

### GX Strategies

- Review the government's portfolio of GX support measures (**from an emphasis on legacy to support for EVs, etc.**) ...etc.
