

**Japan
Association
of
New
Economy**

- Japan Association of New Economy (abbreviation : Shinkeiren / JANE)
- Founded: June 1, 2012
- Members: 525 companies

※as of August 20, 2025

Japan's newest business association dedicated to creating an environment in which individuals and private companies can maximize their potential for economic and social reform centered on digital. With the basic principle of **"Give more authority to private sector"**, JANE publishes numerous policy proposals and statements of both regulatory reform and market creation type every year. It has a diverse membership that transcends the boundaries of size and industry, ranging from start-ups to large corporations, and from IT companies to construction and manufacturing companies. In addition, more than half of the approximately 50 board members and executives are founders of the company, which distinguishes JANE as an "economic organization where entrepreneurs gather". After the 10th anniversary in 2022, JANE is further revitalizing its activities under the new slogan **"Japan Transformation"** as a guideline that encompasses the origin of its activities: the promotion of "innovation, entrepreneurship, and globalization".

MAJOR EVENT

~Think Japan's Future Vision with Business and Political Leaders~

To promote JX (Japan Transformation), we host an annual event called "JX Live! –Envisioning Japan's Future with Business and Political Leaders." The event brings together top executives, politicians, and experts to engage in cutting-edge policy discussions in a dynamic roundtable format.

In addition, the program features the "JX Awards" ceremony, which recognizes next-generation entrepreneurs, as well as the "JX Challenge" live pitch competition, launched in 2024, which has been receiving excellent feedback.

Kitakyushu

Keihanshin
(Kyoto, Osaka, Kobe)

Nagoya

Based on the principles of innovation, entrepreneurship, and globalization, JANE promote advocacy to the government for deregulation and other measures to ensure that government policies encourage the creation and revitalization of the digital economy and are fair to our member companies.

Basic policy philosophy of JANE

(excerpts from the 10th Anniversary Policy Proposal)

Depopulation Low Growth Inward-looking society and economy Globally high tax rates Delay in digital readiness Lacking diversity in society Inflexible government

JAPAN TRANSFORMATION Change Japan Fundamentally

Make Japan a country where "people, knowledge, and money" gather from all over the world.

There is no future for this country unless we change Japan toward a new era with the power of entrepreneurs.

✓ Important Measures for realization of JAPAN TRANSFORMATION(JX)

1

Give more authority to the private sector

- The role of the government should be shaped according to this core principle.
- Foster a **philanthropic ecosystem** centered on private sector.

2

Reduce globally high tax rates

- Countries with high taxes will inevitably decline.
- **Prerequisite for any reform** necessary for JX.

3

Promote and use of "New Combination"

- "New combination" of all the connections that are fluidized by digitalization.
- **Create new value and improve productivity** through "new combination".

Policy Action Item (excerpts from the 10th Anniversary Policy Proposal)

① Drastic reduction in tax rates and elimination of Galapagos regulations in funding and business.

- In order to compete for global talent acquisition and attraction of company locations, drastic reduction of individual/corporate income taxation and inherit tax (e.g., maximum individual income tax rate from current 55% to 40%) and revision of departure tax.
- Revision to book value assessment taxation of tokens, including those held by third parties, and separate taxation of profits from crypto asset transactions.
- Removal of restrictions on the listing of class shares.
- Elimination of Galapagos regulations such as those that hinder inbound tourism (e.g., restrictions on heli-skiing and water cottages).
- Elimination of restrictions on C2C businesses such as ride-sharing and minpaku stays.
- Conduct a collective review of the necessity and effectiveness of all the individual "business laws".

☞ **Companies can create and develop global businesses on a level playing field.**

② Enact a "Basic Immigration Act" and establish an employment system of attracting people from the world.

- Clarification of the principles for accepting foreign nationals by enactment of the Basic Immigration Act and abolition of the technical internship system.
- Introduction and thorough enforcement of rules for starting and ending employment based on job descriptions, which is normal outside of Japan.
- Abolition of systems based on the "breadwinner of the family," such as the spousal deduction.
- Establishment of a social insurance/labor system that facilitates freelance and other forms of work other than "employment".

☞ **Individuals can get opportunities of new job, job change, and job assignment of their choice and demonstrate their abilities in jobs required in the digital age.**

☞ **Companies are able to utilize diverse and highly engaged human resources in the right place and at the right time.**

③ Promote reform competition among local governments and foster a philanthropic ecosystem

- Establishment of government system that promotes reform and competition among local governments with the *doshu* system as one option, and thorough national standardization of data infrastructure.
- Drastic tax reduce and social security spending reform, reform of the public interest corporation system and the donation tax system in an integrated manner, and creation of new money flow through the "private" sector playing a "public" role (e.g., venture philanthropy).
- Recruitment and assignment of highly specialized human resources, and legalization of the EBPM principle in the government.
- Abolishing the lifetime employment system for each ministry, which leads to bureaucrats becoming a resistant force tied to vested interests.
- Adopting the common law approach and avoiding "pre-emptive regulations" through codification.

☞ **Enables efficient government for evidence-based, pro-business responses in an agile manner.**

④ Break away from an educational style that accumulates individual knowledge and strengthen "LEEDF" education on a broad base

- L: Leadership/E: Education/E: Entrepreneurs/D: Digital/F: Financial education– strengthen those in elementary, secondary, and higher education.
- Expanding the number of faculty members with business experience, increasing the students in information related departments and curriculum reform in the university to respond to the digital age.

☞ **Enables individuals to acquire the ability to think for themselves and live in the digital age.**

⑤ Regulatory and taxation systems reforms to ensure digitalization in preparation for the Web3 era

- Enactment of the "Comprehensive Act for the Promotion of the Formation of Web3 Society" to collectively reform regulations and taxation systems that hinder the development and spread of blockchain/NFT.
- Revision of the "Basic Act for the Formation of a Digital Society" to clearly state the principles of complete digitization of all procedures in the public and private sectors, realization of a "zero-cash society" by 2030, and opening of APIs.
- Introduction of regulations prohibiting acts that impede competition and fee regulations focused on OS/applications stores.

☞ **Enabling "new combination" of connections throughout society that creates new value, not mere efficiency.**

■ Economic & Digital Policy

2025/7/22	Announced opinions from the Representative Director Mikitani on the Results of the 27th House of Councilors Election

Carbon Neutral WG

- Launched in April 2022 as a platform for information sharing and discussion among JANE members. This is in response to the global trend of promoting carbon neutrality and the increasing number of companies in Japan that are working on management and business development that respond to a decarbonized society, and the increasing level of climate change response required of companies regardless of their size.
- In its 4th year (FY2025), the existing committees and subcommittees were reorganized, and activities began under five newly established committees: the EV Promotion Committee, the Sustainability Promotion Committee, the Institutional Innovation Committee, the GX Human Resources Development Committee, and the Consumer Behavior Change Committee.
- 33 member companies participated in the WG. (* As of July 2025)

<Recent Activities>

2025/4/24 Released the policy proposal "JANE Carbon Neutral Vision 2025"

2024/12/20 Vice chair and committee members spoke at Kanagawa Prefecture's "Key Points for Innovation in the Environment and Energy Sectors from a Policy Perspective [BAK Connecting Day #21]."

2024/10/9 WG member companies participated in roundtable 4 "Discussing Japan's Decarbonization Growth Strategy with GX Startups - Towards Creating GX Unicorns from Japan" at "JX Live! 2024."

2023/9/27 Submitted opinions on "Draft Guideline for the Promotion of Charging Infrastructure Development" prepared by METI.

2023/7/11 Submitted "JX (Japan Transformation) Policy Proposal – JANE's Vision for Japan's Future" to Prime Minister Fumio KISHIDA. * The proposal also mentions the GX.

2023/7/3 The chair and vice chair spoke at the roundtable "Revitalizing Japan through Green Transformation (GX): GX as Japan's New Growth Strategy" at the JANE's anniversary event JX Live !.

2023/4/27 Released JANE Carbon Neutral Vision, as an outcome of the year-long discussions in the WG.

▲Carbon Neutral WG Phase 2 Members

Next Generation Education WG

- With growing interest in entrepreneurship education, STEAM education, and Digital Transformation(DX) in education to nurture the next generation of human resources, a new "Next Generation Education WG" has been established under the existing Education Reform PT (June 2023).
- Discussions are currently focused on promoting entrepreneurship education and industrial human resource development, strategies for the utilization of educational data, advancing the AI Utilization, and promoting school affairs DX.
- Going forward, based on the published policy recommendations, we will discuss measures to integrate high-quality entrepreneurship education into schools and accelerate educational DX.
- 28 member companies participate in the WG (As of July 2025).

<Recent activities>

- Hold a WG meeting once every three months.
- Presentations on next-generation education by member companies and exchange opinions with related ministries and educational organizations.
- Based on the discussions in the WG, we released the revised 'Policy Recommendations for Realizing Next-Generation Education, Ver. 2,' which builds on and further develops the recommendations announced last year.
- Event were held focused on entrepreneurship, inviting leading experts engaged in cutting-edge work in policy, research, and practice, to provide learning opportunities

▲Koji FUNATSU, JANE
Executive Officer
(Chair of Next Generation
Education WG)

▲Discussions in the WG
(December 2023)

AI Community

- With the rapid spread of AI in society, triggered by the emergence of AI technology, the purpose of this forum is to share and accumulate AI-related application cases and the latest policy trends through the sharing of AI development and utilization cases as well as to building relationships among member companies to create various synergy effects.
- Generally held monthly since its establishment in November 2023. As of July 2025, 56 companies have participated.
- The members present examples of AI utilization and development (business efficiency improvement, new business study, LLM development, etc.), and findings and challenges obtained through AI utilization in practice. Seminars on policy trends by experts and government officials are also scheduled.

<Action Plan>

- Hold Bi-monthly Meeting
- Presentations by member companies
- Exchange opinions with relevant Ministries and Agencies
- Based on WG discussions, consider whether to submit policy proposals when needed.

▲ Kazuo TANAKA, CMO of Stockmark Corporation (left) and Takeshi SUZUKI, Director and Managing Executive Officer of Techmatrix Corporation (center) presenting at the first meeting

▲ Discussions in the Community (Nov. 2023)

DE&I Community

- Established a DE&I (diversity, equity, and inclusion) community to lead discussions on promoting social diversity and economic development. The goal is to implement measures necessary to innovate society and promote the active participation of diverse talent, including women and foreign nationals.
- Generally held monthly since its establishment in January 2025. As of July 2025, 28 companies have participated.
- Members will present their DE&I initiatives and best practices. In the first year, discussions will focus on themes such as "female empowerment in the business world," "fostering female digital talent and CTO/CISO," and "hiring foreign nationals and cross culture inclusion within companies."
- Through hearings with relevant government experts, the latest policy trends will be discussed. From the perspective of private companies actively engaging in DE&I, discussions will be held on the necessary measures to promote DE&I in Japan.

<Action Plan>

- Hold Monthly Meeting in principle.
- Presentations by member companies and visits to member companies.
- Exchange of opinions with relevant Ministries and Agencies
- Based on community discussions, planning to publish a collection of best practices from member companies

▲Community members

Social Events for Member companies

■ Evening Meetup! by JANE

This series of events is targeted for entrepreneurs & executives, providing easy interaction between young and seasoned business leaders. JANE board members also participate in each event, which is held regularly in Tokyo and other locations. We plan to hold events throughout Japan in near future, so that everyone can interact with each other.
(* light meals & drinks will be provided.)

■ Member gathering event

Golf tournaments and mahjong tournaments for the purpose of developing relationships among member companies. The tournament is held at a prestigious golf course in the near Tokyo area, and the mahjong tournament, led by M-League Chairman and Vice Representative Director Fujita, is held under competitive mahjong rules.

■ JX Drive !

“JX (Japan Transformation),” launched by JANE on occasion of its 10th anniversary, serves as a platform for engaging experts from diverse fields in discussions on key themes essential to promoting and accelerating JX.

■ "Must" lectures for management

A "practical education course" offered to corporate managers and executives, as well as those who are seeking to start their own businesses. Specific theme is set each time and experts in various fields are invited to give lectures. The lecture is held 3 to 5 times each year. The first seminar in 2021 focuses on security theory, while the second seminar in 2022 focuses on organizational management theory.

■ PR lecture

A highly popular practical course for those in the PR and IR departments. Held multiple times a year, it covers everything from the basics to advanced PR techniques, including press release writing and media relations. Instructors include Mr. Yuichi Hara (Editor-in-Chief at Mynavi Corporation) and other media professionals from NewsPicks, Nikkei Business, and TV stations.

■ Cutting-Edge Business Seminar in Diet

The "Cutting-Edge Business Seminar in the Diet," where member companies share their advanced technology-driven businesses and policy proposals with invited members of parliament, started in 2018 and has been held 22 times so far. We also provide opportunities for business card exchanges between member companies and parliamentarians, which can be beneficial for future activities

Other events

■ Policy MeetUp!

Based on requests from member companies, this seminar series provides information on the latest policy trends from the JANE secretariats. Participants can learn about the latest policy trends, policies they can benefit from, and industry trends to watch. The seminars are conducted in a hybrid style (online and in-person seminars), with a social networking session following the seminar at the venue.

■ International Study Group

In FY2023, we held study sessions on international trends, where outside experts provide commentary on hot topics in overseas legal and regulatory trends relevant to our policy recommendations, including non-financial information disclosure (8th session), crypto asset regulations in major countries (7th session), and the introduction of OECD Pillar 2 (6th session), lobbying trends and recent tech policy issues in the EU (5th session).

■ Media MeetUp!

This is a networking event with the media for PR professionals from member companies. It is an opportunity to speak directly with leading media representatives about recent topics of interest and behind-the-scenes stories. The first event was held in February 2024 and will be held regularly.

■ Art Action Forum

Established in 2019 as a loose membership forum to pursue collaboration between art and business. It holds special previews of art events for management and seminars on art and business, and in 2022 will change its name to "Art Action Forum" to make it more active. In 2024, we will continue to hold tours to participate in art fairs in Kyoto.

■ Overseas business tours

A business tour for executives. In 2024, we sent a delegation to the Kingdom of Saudi Arabia and the Emirates of Dubai and Abu Dhabi in the United Arab Emirates. We plan to continue sending delegations in the future to encounter innovative and top-notch business and policy models.

« « « Photos: Middle East tour in 2024 » » »

■ NEST-NEXT

A platform for executives, government officials, and others to discuss cutting-edge business trends. The theme of the second edition in 2023 is "Georgia's Potential in the IT Business."
